THESIS STATEMENT

Introverts can feel treated as second-class citizens in society, overshadowed by extroverts who typically assume authoritative roles. The world largely thrives on the "Extrovert Ideal," suggesting that a confident and outgoing way of life is the only path to success. However, the hidden potential and power of introverts are immense. It is crucial to **create a space that addresses this issue, highlights the unique perspectives of introverts, and showcases what it is like to be an introvert in a predominantly extroverted world.**

This space would not only be valuable for introverts but also for those who do not identify as introverts, fostering greater understanding and appreciation for different personality types.

**GRAPHIC
SYSTEM**

GRAPHIC APPROACH

The visual concept for “Beyond the Book” incorporates a blend of images that have been edited to resemble illustrations. To effectively represent the collaboration between the two brands, their brand colors—**black, white, yellow, blue, and red**—are utilized in a balanced manner throughout the design.

The dominant **black and white create a sleek, monochromatic backdrop**, while the primary colors—**yellow, blue, and red are strategically used to highlight key elements**. These bursts of color break the monotony, drawing attention to important aspects.

The design features **paper-like textures, square dotted patterns, scribbled lines, and a single continuous line**, adding depth and texture. The continuous line also creates a sense of flow, while the other patterns enhance the visual experience.

For typography, a sans serif font was essential, as both Amazon Kindle and Beats by Dre use sans serif fonts with variations across their interfaces. Since each brand has its own custom font, it was crucial to find a range of fonts that closely resemble their styles while aligning with the exhibit’s mood.

The tone of voice for “Beyond the Book” is **curious, playful, and engaging**. It invites exploration with a mix of creativity and intellect, encouraging visitors to discover and interact with the experience.

New York Public Library

The Morgan Library

Tisch School

Installing marketing banners on library facades across New York City is a highly strategic approach to targeting readers and commuters, two key audience segments. Libraries naturally attract avid readers, making them an ideal location to connect with book lovers. Additionally, many library facades are situated near transit hubs or in high-foot-traffic areas, ensuring visibility to commuters who pass by daily.
